Al-Sheikh spoke with the British Secretary of State for Commonwealth and Foreign Development

I spoke today with the British Secretary of State for Commonwealth and Foreign Development, Lord Tariq Ahmed, where I called for an immediate halt to the war and the opening of safe corridors for the entry of humanitarian aid into the Gaza Strip such as water, electricity, medical supplies, and food. I stressed our rejection of the displacement of Palestinians from their country, and stressed that the only solution is the existence of a political horizon that will lead to the two-state solution.
